Subject: Air topics for Thursday afternoon weekly

Carl, as I noted I'd like this week's meeting to be extended so we can go over a more complete review of status and next steps on key air actions. I'd to do something different. For each action or project I'd like to express my understanding of the 1st three elements listed below and for you and Monica to fill in gaps or correct my misunderstanding, and then lets discuss the 4th element, next steps. Turning it around like this is unusual but enhances my learning.

1. A very brief summary of the overall situation
2. Current status
3. Our goal
4. Next steps

Here's my list of actions / work in progress. The ones in red were mentioned by Shaun at SLT, and he's asked that I report out on those at Monday's SLT:

- ██████████ Thunder Butte Refinery trans-loading facility

- ██████████ U&O FIP

Send update on Monday after talking to OAQPS

Draft Comm Strat update

- ██████████ WY RH and Basin electric

6 months after WY submits an approvable set of 309 revisions

Plan B: If doesn't look good then don't approve SA

- ██████████ Wind R TAS (I think this is related to air – is that right?)

- ██████████ WY Transportation SIP for Ozone NAAQS

Talking points to Mike K and Kristi and then schedule call for Janet/Shawn to call Todd

Send NPR to Janet and talking points

- ██████████ MT iSIP

Talen and MT are now intervenors, schedule for brief is Feb, MT wants Talen, DOJ talking to SC next Thursday then contact MT AG

- ██████████ Montana Regional Haze FIP Remand

Talen BART analysis needed?

- ██████████ Utah Regional Haze Litigation / BART at Hunter and Huntington

Briefing schedule for EPA in June, request for stay filed, EPA response on stay 12/15/16

- ██████████ Sierra Club Title V Petition - Hunter Plant in Utah

- ██████████ CO's Draft Denver Ozone SIP
